Subject: Yadkin Project License Compliance

Pete,

Cube is committed to Yadkin Project license compliance and we are already working very hard to meet the many compliance deadlines we have ahead of us this year. We appreciate your offer of assistance. While the plans that are due in September 2017 (Recreation, RTE Species Management, and Historic Properties Management) are our priority, we are concurrently beginning work on the updated SMP. To answers your questions specifically, we have not yet established an exact schedule, but we anticipate having drafts of the plans due to FERC in September out in early summer for the required agency review.

Thanks and have a nice weekend!

Karen
