

# Learn more about the Yadkin Hydroelectric Project

## Public Meetings about Relicensing

As a part of renewing its operating license for the Yadkin Project from the Federal Energy Regulatory Commission (FERC), Alcoa-Yadkin invites you to attend public meetings being held June 29-July 1 to provide input and learn more about the relicensing efforts of the Yadkin Project.

Updates will be provided on the technical studies being conducted about the Project. Also, we will review the work of seven Issue Advisory Groups who represent stakeholders throughout the region. More than 100 people participate in these Groups and have been working closely with Alcoa-Yadkin for the past 16 months. Their role is to help define the issues to study in order to understand how the Yadkin Project affects resources.

The agenda for all meetings:

- Overview of the relicensing process and schedule
- Issue Advisory Group and Technical Study Update
- Public input, Questions and Answers
